### PCI-Mag-CrdRdr-ACTX

Developed using state of the art Microsoft MFC4 technology for enhanced throughput and low overhead, Parijat's communication 32-bit OLE custom controls (OCX), acquires/sends data from or to MagTek Card Reader via its serial port. Manipulate properties using our custom property sheets for utmost user-friendliness at design time. Control polling through your code for optimum performance. OCX's are very fast and also do not require significant Windows resources as DDE drivers or servers do.

**Methods:** Refresh PortOpen

**Events:** Outcome (fires when communication transaction completes)

**This product works with:**

**Microsoft Visual Basic, Visual C++/J++ , Office97, Foxpro95 or any other OLE container.**

### Features:

- No software protection keys or disks.
- Complete context-sensitive help & built-in manual.
- Works in Windows 95 and Windows NT.

*We also develop custom Windows products and applications with PLC's, MS Visual Basic, as well. We can also develop any ActiveX that you may need developed for a specific purpose. We also have an GUI MMI software(Visual Process) written in VB which provides basic SCADA monitoring, alarming, trending, reporting. With Visual Process, any CAD drawings, manuals, vendor data sheets, instrument spec sheets, instrument calibration sheets or any other documentation associated with control systems may also be integrated with the MMI/SCADA system to help attain the ISO9000 certification!*
