

Parijat Flow Measurement Solution

- PCI HMI is a Web enabled as well as Stand Alone desktop data acquisition and control system solution which allows secure real-time access to remote systems using Internet / Intranet communications or any other IP media.
- Inexpensive technology to create leading edge solutions.
 - a) Rapid Deployment b) Real-time Acquisition c) Graphic Rich Interface
 - d) Secure e) Reports f) Proven dependable Technology.
- PCI Solution focuses on Flow measurement in Oil / Gas Industry. Data Acquisition from smart instruments, Smart RTUs & PLCs
- Solution allows Real-Time interface between remote instruments / RTUs / PLCs and Internet or local network. Flow computers connected to servers using Modbus or any other protocol via Ethernet or serial connection.

- Possibilities: Real Time data, Reporting, Trending, Historian, Work Orders, Hardware Health Indicator, Integrate Drawings (P&ID), Graphical Interface.
