

## Parijat Control Systems Web Server – NGS-050

Parijat Control Systems Web Server or NGS-050 is an appliance that allows you to link data from legacy PLCs or other classic smart devices to an embedded web site, so a user may use any web browser on the other side to securely read/write data of the control system.

Drivers for numerous PLCs & other industrial protocols are available to connect the web server to.

NGS-050 web server allows multiple control systems like PLC data to be presented as HTML5 web pages, giving secure access via any web browser.

### Application Examples:

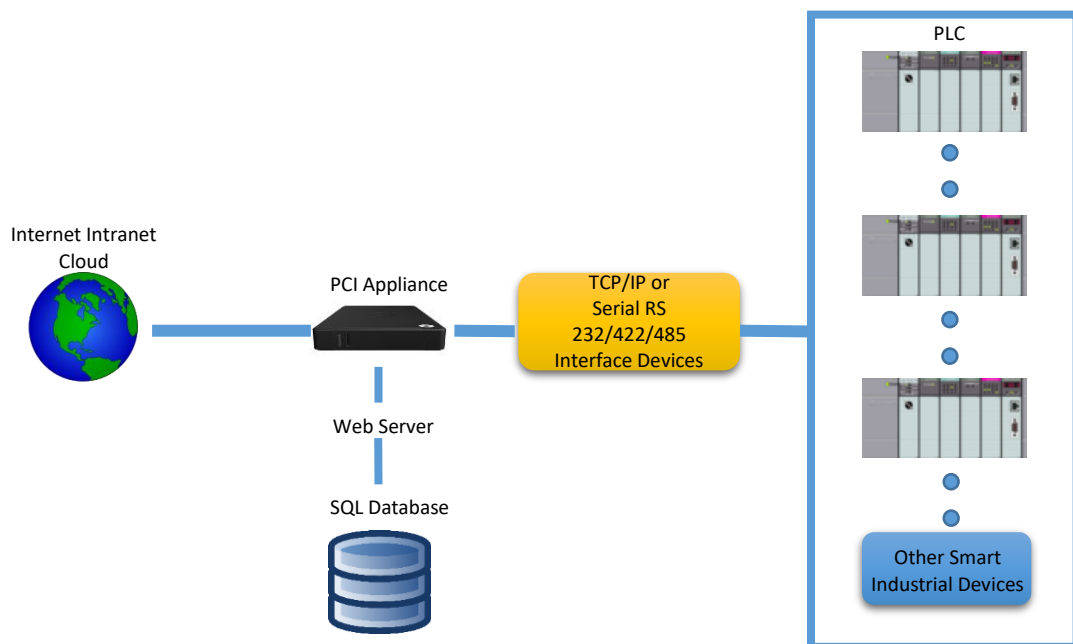

Automatic integration, visualization and remote control via HTML pages.

Remote troubleshooting by remote monitoring & control of bits, registers or parameters. Access reports or any crucial Control systems data from anywhere.

### Features:

- Data is time stamped and all transactions saved to an audit log.
- Events may be defined for data transfer in either direction.
- Use embedded panel mount HW or desktop with any version of MS Windows XP or newer.
- Automatic e-mail notifications.
- Use multiple parallel systems for redundancy, disaster recovery.
- Unlimited transactions, events & data tags.

### Control System Web Server

**Options:**

- With Hardware.
- HW Redundancy
- Any additional features.
