

Parijat Auto Dialer – NGS-020

Parijat Auto Dialer or NGS-020 is a software solution to send notifications via e-mail, SMS or traditional phone calls.

NGS-020 utilizes MS TAPI and also supports a synthesized voice (using text to sound) in various tones. The synthesized text may also contain numeric data. You may also use pre-recorded Wav files. Escalation of notifications is supported.

Source of data may be a database or OPC or any other means supported by MS VS to exchange info. Drivers for 3rd party SCADA systems software like Wonderware, Factorytalkview, RSVIEW, WinCC, iFix etc. are also available.

Features:

- Supports a wide range of end devices and OS such as PC, Mac, Linux, Android, iOS, Windows Phone, ChromeOS, Raspberry Pi and thin clients
- Use any voice grade phone modem for dialling.

Various deployment mechanism options are available:

- Use the clients IT server infrastructure or Cloud
- Use the landline, MajicJack, type cell network
