

Tank Gauging System

Parijat Tank Gauging System is a management system for fuel storage applications. This software is designed for continuous monitoring of volume, level, density, mass, temperature and other parameters. In addition, the system provides product leak and transfer monitoring as well as reporting capabilities.

Basic features:

1. Supports up to 254 ATG devices per comm. Port. Up to 255 comm ports.
2. User selectable colors for tanks & products.
3. Automatic product inventory reporting
4. Alarm viewer (historical/summary mode).
5. Trending (real time/historic mode).
6. Tank farm overview in both graphical and tabular form.
7. Real time updated detailed information for a selected tank in both graphical and table formats.
8. Transfer status and leak detection real time information.
9. Alarm set point configuration window.
10. Auto scan mode used for automatic scanning all ATG devices.
11. Adding, modifying and removing groups of tanks.
12. Port monitor window, showing status of the serial communication to the ATG devices using Modbus.
13. Uses Microsoft Access as the database.
14. May be customized to support other features, integrated with other systems or perform other activities. (Contact factory for details)
